

designexplorationprogram

LEARN THROUGH MAKING.

The design studio is the heart of the program. Students learn through the making of hand drawings, digital drawings, collages, and physical models. Students learn to communicate their design ideas in an open and constructive environment.

DESIGN EXPLORATION PROGRAM

UNIVERSITY OF FLORIDA // SCHOOL OF ARCHITECTURE

June 14, 2020-Jul 3, 2020

Meals and miscellaneous expenses are

not included in the program cost. Students should allocate approximately \$20 to \$30 per week if they intend to prepare their own meals. Transportation will be provided to local supermarkets, or participants may bring food from home. There are also a variety of affordable restaurants within walking distance.

MISSION
The primary initiative of the University of Florida's Design Exploration Program (DEP) is to offer both valuable insight and first-hand experience to prospective architecture design students. The program aims to immerse participants in an architectural educational environment that introduces students to core aspects of the university's design curriculum as well as to essential architectural principles in general. A greater understanding of both the architectural curriculum and environment at the University of Florida is achieved through the construction of studio design projects which equips students with hands-on experience with the design process, program activities which serve to foster a sense of community and enhance teamwork among participants, and field trips which aim to broaden the scope of architectural theories, methods, and principles discussed during the program.

DESIGN STUDIO

An intensive design studio directed by UF School of Architecture faculty is the heart of the DEP experience. A low instructor / student ratio ensures personal attention. In studio, participants develop projects involving various phases of architectural design development and presentation. Basic design exercises such as drawing, model building and investigations of architectural concepts and constructions complement the studio projects.

SEMINARS

Seminars covering various aspects of design and building also form an important part of the program. Formatted as lectures and group discussions, they are led by guest professors in the morning and evening hours. Varied issues such as design processes and methods, architectural history and theory, model making techniques, use of photography as a medium of architectural documentation and the role of computer / digital technology in contemporary architectural practices are presented.

FIELD TRIPS

Field trips provide participants with exposure to important works of architecture from Florida's past and present. Through on-site visits to architectural offices, buildings under construction and architecturally significant sites, participants learn about design, building and the architectural profession.

RESIDENCE HALL

DEP participants live in the dormitory suites conveniently located near the College of Design, Construction and Planning on the UF campus. Accommodations have kitchen facilities that are supplied with utensils, semi-private bedrooms and baths, coin operated laundry facilities, student lounges and recreation areas where participants can relax and socialize during free time. In-house counselors provide round the clock supervision.

- Completed DEP application form
- Current copy of your academic transcript from your school
- Personal statement [one or two pages in length] describing how creative and intellectual interests will benefit from

cal supermarkets, or participants may bring food from home. There are also a variety of affordable restaurants within walking distance.

Participants are responsible for their own laundry and coin-operated facilities are conveniently located in the residence hall.

PROGRAM FEES

The \$2200 program fee for the Design Exploration Program covers the program's three weeks of instruction, studio supplies and materials, on-campus housing, and all travel expenses.

FINANCIAL AID

Scholarships for participants in need of financial aid are available on a limited basis. Those with a genuine need for financial aid must include a separate letter in their application packets explaining their request and indicating how much of the fee they can afford to pay. DEP faculty will evaluate applicants requesting financial aid to determine if a scholarship will be offered. Financial aid decisions will be determined on the basis of the overall strength of the materials in the individual's application packet.

APPLICATION PROCESS

Program dates are June 14, 2020-Jul 3, 2020
The deadline for all application materials is June 6, 2020. To apply for participation in the program, please submit the following

materials to the UF School of Architecture: and contribute to participation in DEP

- Register on-line <http://reg.conferences.dce.ufl.edu/SP/1400070986> and pay application \$25
- Optional letter of recommendation

Send Completed Application Packets to:

Those with communication disabilities can contact UF through the Florida Relay Service (FRS), a free service facilitating communication through telecommunication devices for the deaf (TDD), by calling 1-800-955-8770 (voice) or 1-800-955-8771.

Students learn fundamental languages of design thinking as they shape spatial relationships and develop design proposals. The collaborative studio environment allows for students to learn from one another and to quickly develop a range of skills.

DEVELOP DESIGN SKILLS.

While the studio is a critical part of the program, students also have opportunities to get out of the studio on structured field trips and recreational outings. Travel and visit exceptional examples of both contemporary and historical architecture. Visit and meet architects engaged in the contemporary practice of architecture. Enjoy some of North Florida's exceptional landscapes.

ENJOY.
