HISTORY OF ARCHITECTURE PART ONE

PREHISTORY THROUGH THE MEDIEVAL TIMES

The great buildings and cities of the pre-modern world, be it the Pantheon or Machu Picchu, evoke awe due to their scale, technology, and vision. This course will introduce students to the history of architecture and urbanism from the prehistoric to the medieval period. We will focus on the global historical architecture that is still relevant to students of architecture today. We will examine how and why these structures and cities were built. We will analyze their formal, spatial, structural, and environmental principles.

This course examines and problematizes the diverse ways in which architecture is understood through social, religious, cultural, environmental, and political concerns in the Western and non-Western world. The course covers movements, architects, ideas, empires, and discourses that have produced architecture till the medieval period. We will examine buildings and cities in order to see how they relate to the sustainability of societies. This is the first part of the architectural history survey for architecture students.
