

## MINOR IN LANDSCAPE ARCHITECTURE

The objective of a minor in Landscape Architecture is to provide a general overview of the profession. The minor provides introduction to environmental and cultural issues and to design, planning, and management theory and applications. A minor does not qualify a student for practice or for professional licensure.

Students must be accepted into an upper division college prior to application. Application for the minor should be made as soon as possible after acceptance to aid in charting coursework. To be considered, students must have a minimum 2.5 GPA.

Students must maintain a C or higher in all minor coursework. All graduating students who meet the requirements and have been approved for the minor will have the minor officially listed on their transcript.

A minimum of 15 hours is required, with 6 hours of required coursework. The remaining hours should be determined based on the student's interests and background. Students with design, construction, engineering, or other technical backgrounds may participate in design, theory, and/or construction studios in addition to lecture courses. Acceptance into studio courses and graduate level courses is with the permission of the instructor and as space is available. Upon application, students will be advised as to what courses are appropriate.

	Semester Offered			
<b>Required of all students:</b>				
LAA 1330 Site Analysis (on-line)	3 Cr	F		S-A
<b>One of the following is required:</b>				
LAA 1920 Introduction to Landscape Architecture (on-line)	3 Cr	F		S-B
OR				
LAA 2710 History of Landscape Architecture	3 Cr	F		
<b>General courses open to all students:</b>				
LAA 3230 Theories of Landscape Architecture	3 Cr	F		
(Pre-requisite: LAA 2710 History of Landscape Architecture)				
LAA 1532 Landscape Management	3 Cr		S	
LAA 4210 Professional Practice	3 Cr		S	
(Needed: Permission of instructor and junior level standing or above)				
LAA 6382 Ecological and Environmental Policy	3 Cr	F		
LAA 4905 Special Studies in Landscape Architecture	1-6 Cr	F	S	S-A
<b>General Courses open to students with previous computer experience:</b>				
LAA 2376 Design Communication 1	3 Cr	F		
(Needed: Permission of instructor)				

Additional courses in the professional design and construction sequences and in graduate courses may be possible for students with specialized backgrounds such as in other design fields, building construction, or engineering. Permission of the instructor is required to take courses other than the ones listed above.
