Department of Urban and Regional Planning, Graduate Joint Associate Professor
Master of Sustainable Development Practice, Affiliate Faculty, 2013
School of Architecture, Undergraduate Affiliate Professor
Center for Latin American Studies, Affiliate Faculty
- 1990 - 1991 **Johns Hopkins University, School of Continuing Studies. Baltimore, Maryland**
Lecturer, "Design Issues in Development" seminar, Certificate Program in Real Estate Development
- 1990 **University of North Carolina at Chapel Hill. Chapel Hill, North Carolina**
Instructor for an Urban Design Short Course on planning and real estate studies including site analysis, design concepts and principles, program and jurisdictional parameters.

EDUCATION

- 1988 **Harvard University, Graduate School of Design. Cambridge, Massachusetts**
Master of Landscape Architecture
Vice president of Harvard Real Estate and Urban Development Forum, 1987-88
- 1978 **University of Florida. Gainesville, Florida**
Bachelor of Landscape Architecture, Summa Cum Laude
- 1973 **University of Madrid. Madrid, Spain**
Foreign studies program

LICENSURE

- 1979 - Present **Registered Landscape Architect. State of Florida**

RESEARCH AND CREATIVE WORK

- 2012 **Re-visioning Sacred Space: An Open Space Sacred Place for the Cotton Club Museum & Cultural Center. Gainesville, Florida**
Principal Investigator on a \$1,000,000 proposal with an interdisciplinary team of practitioners, academics and East Gainesville Cotton Club community stakeholder's for the National Open Space Scared Places Award Initiative. Proposal was not selected.
- 2007 - 2010 **Economic Development, Community Involvement and Planning for the Future in Hamilton County, Florida, Hamilton County, Florida**
An interdisciplinary team of faculty from the University of Florida provided assistance to Hamilton County with economic and physical planning. Ranking second to last in per capita income among all Florida counties, this project aims to facilitate the citizens of the county to raise their standard of living, achieve higher educational levels and improve their quality of life. This three year \$365,000 grant was organized by the School of Natural Resources and Environment with the collaboration of the Departments of Family, Youth and Community Sciences, Food and Resource Economics, Urban and Regional Planning, Landscape Architecture and the University of Florida Institute of Food and Agricultural Sciences (IFAS) County Extension Office.

- 2006 - 2008 **Visioning the Waldo Road Corridor, East Gainesville, Florida**
 The Waldo Road Corridor Visioning study is an interdisciplinary effort between University of Florida faculty and students in architecture, urban and regional planning and landscape architecture in collaboration with municipal agencies and local stakeholders to coordinate conceptual planning policy, ecology, transportation and land use strategies that enhance livability and provide economic opportunity for East Gainesville. The University of Florida, the City of Gainesville and Alachua County will partner in this effort through a \$105,000 grant to extend the value of existing infrastructure and leverage new investment towards a unified community vision.
- 2004 **Design Competition for the Greenspace Master Plan for Ross Bridge Development.**
Birmingham, Alabama
 This national design competition addressed issues of park design focused on historic preservation of a Confederacy bridge; ecological remediation for a disturbed creek; historical & ecological interpretation; design guidelines for minimizing the negative impacts of stormwater from development on water quality & quantity on natural waterways; and greenspace connectivity & trail system design. One student in the studio won second place out of forty entries.
- 2003 – 2004 **Costanera Sur: Gateway to the Osa. A Scenic Development and Conservation Corridor.**
Southern Pacific Coast, Costa Rica
 Working in collaboration with an interdisciplinary and interinstitutional team of Costa Rican students and professionals in landscape architecture, architecture and environmental law from the University of Florida, University of Costa Rica and the Universidad de Diseño, the team developed a proposal for a scenic development and conservation corridor, the first in the country, along the Costanera Sur highway in the economically depressed but ecologically rich southern Pacific Coast of Costa Rica. The proposal addresses multiple issues: a more sustainable pattern of integrated conservation and tourism/community development; safety mitigation for pedestrians and wildlife from the impacts of the relocated inter-American highway along this corridor; the design of a multi-modal canopy road incorporating bicycle lanes, sidewalks and horse trails for use by locals and tourists; and the protection and enhancement of public access to beaches within the coastal zone.
- 2003 **TROPARC: Center for Environmental Planning and Design in the Americas.** *University of Florida, Department of Landscape Architecture*
 Became the center's new director with a mission to advance environmental planning and design in the Neotropical region of the Americas through interdisciplinary project development, research and education.
- 2002 **Created Stormwater Wetland Design: Sweetwater Branch in the Duckpond Neighborhood & the University of Florida's Cultural Complex.** *Gainesville, Florida*
 In an effort to reduce the negative impacts of stormwater on ecological systems, these projects focused on improved design and management of stormwater systems by using ecological engineering principles and created wetlands. In both projects, the designs: prevent flooding using pools and a floodplain/riparian system; use sinuosity in stream alignment to slow the speed of water; to reduce erosion, use rock covered walls at curved points and outfall locations and bio & photo biodegradable geotextiles on stream banks for plant establishment; use native aquatic vegetation to help phytoremediate the water; and use a baffle system consisting of CDS (continuous deflective separation systems) boxes and diversion walls to help settle out sediment, remove floatable waste and capture free oils and grease in order to not overload the wetland capacity. The studio was conducted in collaboration with wetland ecologist Dr. Mark Clark.
- 2002 **Flagler County GIS Planning and Design Study.** *Flagler County, Florida*
 Faculty and graduate students from the departments of Landscape Architecture and Urban and Regional Planning conducted a semester long Geographical Information System (GIS) study focusing on three areas of Flagler County. The first was to develop future land use plans for the year 2050 taking into account projected population growth for the county. Flagler County is the fastest growing county in the state of Florida. The second was to study the impact of this growth on the coastal area. And the third was to develop redevelopment plans for the city of Flagler Beach addressing the stormwater and flooding problems and developing an urban design vision for the city for the year 2050. The studio was conducted in collaboration with the Florida Community Design Center.

- 2001 **East Gainesville Master Plan.** *Gainesville, Florida*
 In order to facilitate the planning process undertaken by the city of Gainesville and Alachua County, an environmental design studio was conducted in collaboration with Professor Tom Hctor to develop Master Plans for East Gainesville. These Master Plans addressed conservation lands as an integral part of the areas identity, integration of transportation and land uses, strategies for infill and protection of existing neighborhoods. The studio also developed graphic boards to help residents better understand current planning concepts to facilitate their participation in the planning process. And, in order to plan within a contextual framework for East Gainesville, the studio began by using GIS to determine suitability of land in Alachua County for conservation, agriculture and urban development. The studio was conducted in collaboration with the Florida Community Design Center & was presented to public officials & area residents.
- 2000 - 2001 **Maya Ruins of Copan Archeological Park Management Planning Study.** *Copan, Honduras*
 Landscape Architect and Land Planning member of an international interdisciplinary team organized by the Wildlife Conservation Society to develop a Comprehensive Management Plan for the World Heritage site of the Maya Ruins of Copan Archeological Park in Copan, Honduras. The study includes the development of an emergency plan to address damages incurred from Hurricane Mitch in 1998; the development of a master plan addressing changes needed to better accommodate visitors while offering improved protection of the cultural and natural resources of the park; development of a plan to improve the connection and mitigate the impact from visitors to the adjacent city of Ruinas de Copan; develop a regional plan that addresses expanded tourism potential to other archeological sites as well as sites with ecotourism potential for improved economic benefit to the local communities. This project was undertaken by a team of U.S. and Honduran collaborators funded by a \$1,000,000 loan from the World Bank to the government of Honduras.
- 1999 - 2000 **Depot Avenue / South and East Downtown Gainesville Urban Planning and Design.** *Gainesville, Florida*
 Collaborating faculty member developing sustainable urban planning and design proposals focusing on urban restoration, ecosystem protection, transportation efficiency, environmental education, and economic development. Faculty and students from the Departments of Landscape Architecture and Architecture collaborated with the College of Architecture's Center for Construction and Environment as part of a \$243,415 U.S. E.P.A. and City of Gainesville grant.
- 1999 **Rural Housing and Community Design.** *Levy County, Florida*
 Collaborating faculty member developing an environmentally responsible and socially mixed community design for a 1,000-acre rural site in Levy County. Faculty and students from the Departments of Landscape Architecture, Urban and Regional Planning and Architecture collaborated on this applied research project. The study was funded for \$10,000 by landowner Gary Heartly.
- 1998 - 1999 **Hurricane Mitigation and Post-Disaster Redevelopment: A Project in Support of Interdisciplinary Collaboration in Policy, Planning and Physical Design Alternatives for Flagler County, Florida**
 Lead faculty coordinator between the Department of Landscape Architecture and the College of Law. The faculty and graduate student lead study applied several principles of coastal hazard mitigation including: restricting or limiting development in potentially dangerous areas; maintaining the natural defenses of the coastal area; and improving the capacity of development to withstand impacts of hurricanes. The study was funded for \$10,000.00 by Flagler County.
- 1998 **El Pilar Archeological Reserve for Maya Flora and Fauna.** *Belize and Guatemala, Central America*
 Participated in a one-week charrette with Belizean and Guatemalan governmental officials and local community representatives to develop a bi-national framework for a Management Plan.
- 1997 **College of Architecture Faculty Design Exhibit.** *University of Florida*
 Exhibited the Master plan for the El Pilar Archeological Reserve for Maya Flora and Fauna, Belize and Guatemala.
- 1997 **El Pilar Archeological Preserve for Maya Flora and Fauna.** *Belize and Guatemala, Central America*
 Participated in a one-week interdisciplinary round table meeting to strategize the future of the El Pilar Preserve in Guatemala and Belize.

- 1996 **Study of Development Alternatives for the Suwannee River Watershed and Four Communities.** *Levy, Dixie, Suwannee, Gilchrist, Hamilton, Lafayette, Madison and Columbia Counties, Florida*
Principal Investigator. Faculty and undergraduate students in Landscape Architecture developed analyses for the Suwannee River watershed, for four small communities along the river and explored development alternatives for three types of sites within each community: roadside commercial, riverside and fringe residential. The Suwannee River Water Management District and representatives from the communities of White Springs, Branford, Fanning Springs and Suwannee participated. The Suwannee River Water Management District funded the study for \$3,000.00.
- 1996 **El Pilar Archeological Reserve for Maya Flora and Fauna.** *Belize and Guatemala, Central America*
Recipient of the 1996 Tinker Foundation Field Research Award to conduct site planning Studies focusing on nature and cultural tourism as a means for resource conservation and economic development. El Pilar, a potential future bi-national park, offers a creative conservation strategy that promotes sustainable agriculture and biodiversity in the Maya region by restoring traditional Maya settlement patterns and use of the land as a means to develop polycultural alternatives to current farming practices.
- 1994 - 1995 **The Ordway Swisher Preserve, Etoniah Creek and Camp Blanding Land Use and Land Management Study.** *Alachua, Putnam, Clay and Bradford Counties, Florida*
Principle investigator. Faculty and undergraduate students in Landscape Architecture developed land use, land management and implementation strategies for 150,000 acres for the St. Johns River Water Management District, the University of Florida and The Nature Conservancy. Issues explored included potential linkages among/between protected areas, methods for implementation of land use strategies and economic implications of land use. The University of Florida's Division of Sponsored Research and the St. Johns River Water Management District funded the study.
- 1994 **Tikal National Park.** *Guatemala, Central America*
Landscape Architect and Land Planning consultant for the Paseo Pantera Consortium composed of the Wildlife Conservation Society (a division of the New York Zoological Society) and the Caribbean Conservation Corporation. The study includes assessment of existing park infrastructure for both visitors and resident employees; development of a master plan addressing changes needed to better accommodate 110,000 visitors a year and provide improved living conditions for the park and archeological workers; development of an environmental education center; and expansion of the visitor center and museum. This project was undertaken by a multidisciplinary team of U.S. and Guatemalan collaborators to develop a Comprehensive Management Plan for Tikal National Park.
- 1993 **Newnans Lake Watershed Management Plan.** *Alachua County, Florida*
Principle investigator. Organized an interdisciplinary group of University of Florida faculty, undergraduate and graduate students from the Departments of Landscape Architecture, Urban and Regional Planning, Environmental Engineering Sciences and Environmental Law to develop Watershed Management Plans for a 50,000-acre watershed around Newnans Lake, east of Gainesville, Florida. The study investigates sustainable approaches to integrating conservation and development. The St. Johns River Water Management District funded the study. This study won first place out of 78 entries in the 1994 American Society of Landscape Architects (ASLA) National Student Design Competition in the Undergraduate Research Category.
- 1993 **Caribbean Conservation Corporation Green Turtle Research Station.** *Tortuguero, Costa Rica, Central America*
Landscape Architect and Site Planning consultant for the Caribbean Conservation Corporation (CCC). The study included recommendations for the adaptive reuse of the historic Casa Verde, the original Dr. Archie Carr green turtle research station, and for site planning issues for the new research station.
- 1993 **La Muralla National Park.** *Honduras, Central America*
Landscape Architect and Land Planning consultant for the Paseo Pantera Consortium composed of the Wildlife Conservation Society (a division of the New York Zoological Society) and the Caribbean Conservation Corporation. The study included infrastructure recommendations for both the Park and the community of La Unión to support conservation, environmental education

and ecotourism. Predominantly a cloud forest, La Muralla, a 38,000-acre National Park in central Honduras, is valued as a resource for water, biodiversity and tourism.

- 1992 - 93 **Affordable Housing for Downtown Jacksonville.** *Jacksonville, Florida*
Principle investigator for an Affordable Housing Study for downtown Jacksonville, Florida. The study was conducted for the Jacksonville Downtown Development Authority by an interdisciplinary team of graduate students and faculty from the departments of Landscape Architecture, Architecture, Urban and Regional Planning and, Finance, Insurance and Real Estate in conjunction with the College of Architecture's Shimberg Center for Affordable Housing. The Jacksonville Downtown Development Authority funded the study.
- 1992 & 1993 **College of Architecture Faculty Design Exhibit.** *University of Florida*
Exhibited several design projects including: the winning entry for a residential estate design competition for a site outside of Atlanta, Georgia; the design for an urban park built in downtown Baltimore, Maryland; and the entry for the New American Green Design Competition.
- 1992 **A New American Green Design Competition.** *Olympia Fields, Illinois*
Selected Design Competition Entry for the New American Green Design Competition Catalog. Out of two hundred and twenty eight entries, forty-seven were selected for publication in the catalog.
