REVEALING & MODELING LANDSCAPES

Overview:

The impact of the work we do as landscape architects depends on our ability to visually convey our ideas to others (teammates, clients, consultants, the public). The means we have at our disposal are pens, pencils, paper and computers through which we explore landscapes conceptually and physically.

This course will explore drawing as a way of understanding and shaping what we experience in the landscape. We will explore drawing not only as a way to represent fully formed landscapes or ideas, but as a tool for seeing and understanding space, movement, objects and conditions. Students will be introduced to sketching, perspectival drawing and projective drawing. The course will introduce measured drawings and 2D digital representation techniques through AutoCAD. Students then progress to working on 3D modeling with Rhino.

Objectives:

- To develop the ability to “see” and graphically describe landscapes.
- To develop the ability to recognize spatial relationships and to articulate the physical environment graphically.
- To develop the ability to clearly and effectively convey concepts in both analog and digital format.
- To develop the skills in 2D measured drawing through AutoCAD.
- To develop the skills in 3D modeling through Rhino.
- To develop confidence in your graphic skills.

Format:

The four-hour class is divided into two sections, 2 hours per section with 15 min break in between. The first half (2-4pm) will be demonstrations, lectures and pin-ups (we will review previous week assignments as a group). Attendance is mandatory. The second half (4:15-6:16pm) will be workshops and Q&As, which is not required to attend, if you are comfortable on your assignments.

Content:

All course content will be available through CANVAS, UF’s online learning portal. Students may access this site at https://lss.at.ufl.edu/ by logging in with their UF credentials. Under LAA4362, links to the course materials will be available on the course website including the assignments, tutorials, demonstrations, reference, etc. All assignments are to be submitted to CANVAS unless otherwise indicated.

Grading:
Detailed grading criteria for each offering of this course can be found in the course handout for the specific instructor and semester.

Grading will adhere to the University of Florida Grade Policy:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>A</th>
<th>A-</th>
<th>B+</th>
<th>B</th>
<th>B-</th>
<th>C+</th>
<th>C</th>
<th>C-</th>
<th>D+</th>
<th>D</th>
<th>D-</th>
<th>E</th>
</tr>
</thead>
<tbody>
<tr>
<td>Numeric Grade</td>
<td>100-93</td>
<td>92-90</td>
<td>89-87</td>
<td>86-83</td>
<td>82-80</td>
<td>79-77</td>
<td>76-73</td>
<td>72-70</td>
<td>69-67</td>
<td>66-63</td>
<td>62-60</td>
<td>59-0</td>
</tr>
</tbody>
</table>

According to Departmental Policy, Landscape Architecture majors must receive a C or better to move forward. Any grade lower than a C will require that the course be taken over again.

**Grading Percentages:**

- **Assignment #1_Sketchbook** 10%  
- **Assignment #2_Illustrator Diagram** 10%  
- **Assignment #3_Photoshop collage** 10%  
- **Assignment #4_Photopshop plan + section** 10%  
- **Assignment #5_Color pencil rendered plan & section and Indesign board** 10%  
- **Assignment #6_AutoCAD principles** 10%  
- **Assignment #7_AutoCAD plan drawing** 10%  
- **Exercise #1_SketchUp basic** 5%  
- **Assignment #8_Rhino essential operations** 10%  
- **Assignment #9_Rhino complex generations** 10%  
- **Participation** 5%

**Assignment Components:**

**Assignment #1_Sketchbook**
This is a weekly sketching exercise throughout Summer C. You are required to keep a sketchbook (paper or digital), to fill 3 pages (6"x8") / sketches each week with your outdoor space perspectives, book reviews, and tree/person/vehicular exercises. The goal is to establish the habit of sketching, to train your eye and hand in representing landscapes, to draw your idea/concept down on a paper. Detail requirements see assignment handout.

**Assignment #2_Illustrator diagram**
This assignment deals with basic diagramming and analysis techniques using Adobe Illustrator, with particular attention to line, shape, symbol and layer management. Detail requirements see assignment handout.

**Assignment #3_Photoshop collage (studio project)**
This assignment deals with combining photographic image components to assemble one single composite graphics, to communicate a clear design message. Detail requirements see assignment handout.

**Assignment #4_Photoshop rendering plan & section**
This assignment deals with basic color rendering techniques using Adobe Photoshop, with particular attention to selections, transparency, texture and layer management.
Assignment #5_Color pencil rendered plan & section + Indesign board (studio project)
This assignment is to understand basic landscape design graphic (plan and section); to get familiar with color pencils, this most popular-used media in landscape design offices. You will render one landscape plan and section(s) for your studio project, using color pencils and drawing pen (if needed). Lastly using InDesign to format all drawings for presentation.

Assignment #6_AutoCAD principles
This assignment will explore the basic concepts and principles of CAD. Students will learn basic commands and techniques for digital drafting and transferring hand drawings to a CAD environment.

Assignment #7_AutoCAD plan drawing
This assignment will build on the AutoCAD principles developed in the previous assignment and focus on the skills and techniques necessary to draw landscapes in plan.

Assignment #8_Rhino essential operations
This assignment is to understand the Rhino interface; to utilize basic orientation techniques, such as planar & poly-surface creation, manipulation & extraction operations, etc.

Assignment #9_Rhino complex generation
This assignment is to generate complex surfaces; to explore free-form modeling techniques; to edit surface by manipulating control points, etc.

Exercise #1_SketchUp basic
This exercise to understand the SketchUp interface; to utilize basic modeling tool, apply materials and set scenes and styles.

Assignment Submission:
All student work may be retained and used by the Department of Landscape Architecture. Digital Copies of student work for this course must be turned in at the completion of each assignment. No grades will be computed into the final course grade until digital submissions have been turned in as requested. Please follow the directions given by the instructor as to how they will be submitted (Sakai, CD, PDF, word file, etc.). However, all files must be named as follows:

    course# name project_student name. dwg/pdf/jpg/ai/3dm...
    Example: 3352PlantDesAssig10_Smith
    4ch 8ch 8ch 6ch
    Use caps for separation
    No spaces, hyphens, or underscoring

Class Attendance:
Attendance is required for all Demonstrations/Lectures. In the event that a student is unable to attend class due to extenuating circumstances such as illness, or emergencies, the student shall notify the instructor prior (via email) to the start of class. Students must provide documentation regarding the absence (i.e. doctor’s note). Failure to notify the instructor of an intended absence could result in a full letter grade reduction for the final grade in the course. Two or more absences without notification or documentation will result in a failing grade for the course. Tardiness (more than 15 minutes after class begins) will count as a half absence. All decisions regarding approved or accepted requests for absence from the class shall be at the discretion of the instructor.
Class Preparation:
Always make sure you have your work with you so you can follow the demonstration. No accommodations or extensions will be made for students who are not prepared. In addition to having your project work with you, please make sure you are also fully prepared with any other materials needed for class before class starts (i.e., print-outs, rolls of trace paper, drawing utensils, etc.).

Policy For Make-up Exams or Other Miss Work:
Late submissions are strongly discouraged. Late submissions will receive a full letter grade deduction for each day past the deadline. Work submitted more than two week late will not be accepted. Please note that technical difficulties do arise, and will generally not be considered an excuse to miss a deadline. It is in your best interest to complete your assignments early so that you have time to work through any unforeseeable problems.

If a student suffers undue hardship and is not able to meet a submission deadline, they may make a formal request for an extension to the course instructor prior to the deadline. The student must email the course instructor informing the instructor of the situation that warrants consideration for an exception (death in the family, serious illness) with documentation as required by the University.

IMPORTANT: Accommodations will NOT be made due to lost data, nor will there be granted any last-minute extensions on account of workload.

Getting Help:
For issues with technical difficulties for E-learning in Canvas, please contact the UF Help Desk at:
Learning-support@ufl.edu
(352) 392-HELP - select option 2
https://lss.at.ufl.edu/help.shtml

Any requests for make-ups due to technical issues MUST be accompanied by the ticket number received from LSS when the problem was reported to them. The ticket number will document the time and date of the problem. You MUST email your instructor within 24 hours of the technical difficulty if you wish to request a make-up.

Academic Honesty:
The University requires all members of its community to be honest in all endeavors. When students enroll at UF they commit themselves to honesty and integrity. Your instructor fully expects you to adhere to the academic honesty guidelines you signed when you were admitted to UF. In completing the registration form at the University of Florida, every student has signed the following statement:
“I understand the University of Florida expects its students to be honest in all their academic work. I agree to adhere to this commitment to academic honesty and understand that my failure to comply with this commitment may result in disciplinary action up to and including expulsion from the University.”

Furthermore, on work submitted for credit by all UF students, the following pledge is either required or implied:
“On my honor, I have neither given nor received unauthorized aid in doing this assignment.”
It is to be assumed that all work will be completed independently unless the assignment is defined as a group project by
the professor. This does not mean that students cannot help one another in learning material, but all work that is turned in
must be independent work of that individual.

Misrepresentation or plagiarism, such as claiming another’s work to be one’s own, refers to graphic and design work as
well as written work. Submitting work from one course to fulfill the requirements of another (unless expressly allowed by
the instructor) is also misrepresentation.

The University Honor Code and the Department of Landscape Architecture Academic Honesty Policy are to be followed to
the letter. Any students found to have cheated, plagiarized, or otherwise violated the Honor Code in any assignment will
be punished according to the severity of the act and may be referred to the Honor Court. It is each student’s responsibility
to report any infraction, and it is expected that each faculty will report all infractions as well.

For more information, see http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/ and the Department of
Landscape Architecture Academic Honesty Policy.

Student Accommodations:

Students with disabilities requesting classroom accommodations should first register with the Disability Resource Center
(352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered students will receive an
accommodation letter which must be presented to the instructor when requesting accommodation. Students with
disabilities should follow this procedure as early as possible in the semester.

Counseling Resources:

Students experiencing crisis or personal problems that interfere with their general well-being are encouraged to utilize the
university’s counseling resources. Both the Counseling Center and Student Mental Health provide confidential counseling
services at no cost for currently enrolled students. The Counseling Center is located at 301 Peabody Hall (next to Criser
Hall). Student Mental Health is located on the second floor of the Student Health Services in the Infirmary. For further
information on services and how to make an appointment, call the Counseling Center at 392-1575 or Student Mental
Health at 392-1171. See the following web sites for additional resources: Counseling Center: www.counsel.ufl.edu and
Student Mental Health:
http://www.hsc.ufl.edu/shcc/smhs.htm

Religious Holidays:

The university calendar does not include observance of any religious holidays. The Florida Board of Governors and state
law govern university policy regarding observance of religious holidays. Students shall be excused from class or other
scheduled academic activity to observe a religious holy day of their faith with prior notification to the instructor. Students
shall be permitted a reasonable amount of time to make up the material or activities covered in their absence. Students
shall not be penalized due to absence from class or other scheduled academic activity because of religious observances.

Evaluations:

Students are expected to provide professional and respectful feedback on the quality of instruction in this course by
completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful
manner is available at https://gatorevals.aa.ufl.edu/students/. Students will be notified when the evaluation period opens,
and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under
GatorEvals, or via https://ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students at https://gatorevals.aa.ufl.edu/public-results/.

Disclaimer:

This syllabus represents our current plans and objectives. As we go through the semester, those plans may need to change to enhance the class learning opportunity. Such changes, communicated clearly, are not unusual and should be expected.

Readings:

Linkedin Learning Tutorials are an incredible resource available to UF students and this class will take full advantage of them.

1. AutoCAD 2016 Essential Training
2. Rhino 5 Essential Training
3. Rhino Project: Architectural Site & Envelope

Books
