

The Nest is Alachua County's newest natural intervention designed for both co-generational living and an enriched public experience for Gainesville residents. Located off of the Hawthorne Trail, *The Nest* is a hub between the nearby Depot Park and the Sweetwater Wetlands Preserve, encouraging pedestrian friendly transportation between the two Alachua attractions with a green bridge over the busy Williston Road. Residents of *The Nest* have the option to combine adjacent residences with each earth-infiltrated pool, providing an overall space for a three-generation family as well as separate individual spaces catered to each generation's needs. Workers of *The Nest* have both individual office spaces within their homes as well as a number of public collaborative spaces. Visitors to *The Nest* experience an open-air public market surrounding a stage for local Gainesville performances of all kinds. This open concept space allows the public to be integrated with their natural surroundings simultaneously as they participate in Alachua County's innovative new take on live, work, play.

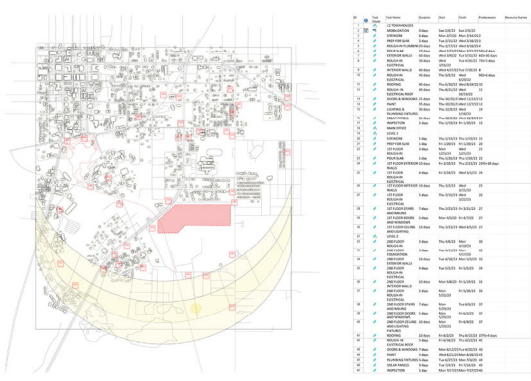

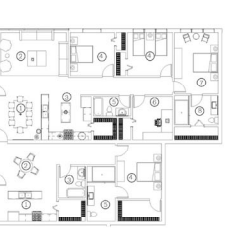

PLANT SCHEDULE

Tree	Code	Botanical/Common Name	Qty
AF	AF	Acacia Redbark / Southern Sugar Maple	52
