The Nest, located in Alamosa, Colorado, serves as a communal retreat for the elderly, providing a place for them to connect and engage with nature. The design includes a central plaza with a fountain, a reading area, and community gardens. The Nest also features a greenhouse, a library, and a café, creating a vibrant space for social interaction.

The design incorporates sustainable practices, including green roofs, solar panels, and rainwater harvesting. The materials used are locally sourced and sustainably harvested, ensuring minimal impact on the environment.

The Nest is designed to be energy-efficient, with passive solar design and efficient insulation. The building is also certified as LEED Gold, indicating it meets stringent environmental standards.
