

**DCP4214 | Class 19677 | Section LEED | 6 Credits
Green Building Strategies (LEED Lab)
|Fall 2023| 100% F2F**

Instructor:	Bahar Armaghani LEED Fellow WELL Faculty Director & Instructional Associate Professor Program in Sustainability and the Built Environment (SBE) College of Design, Construction, and Planning (DCP) University of Florida
Office Correspondence:	352.294.1428 Canvas email (preferred) barmagh@ufl.edu (alternative)
Course Time & Location:	Tuesdays Period 6-8 12:50 – 3:50 Architecture Building, Room 411 Thursdays Period 6-8 12:50 – 3:50 Architecture Building, Room 411
Course Co/Prerequisite:	DCP3210 (or) another course in the topic area and approved by the instructor
Final Exam Schedule:	N/A
Office hours:	Tuesdays 8:30-10:30 am Thursdays 8:30-10:30 am Or By appointment Architecture Building, Room 446
Course Website:	https://ufl.instructure.com/courses/486845 for modules, announcements, assignments, discussions, lecture slides, readings, quizzes, and grades

Strategies to Design, Build, and Operate High Performance Sustainable Buildings

As Part of UF’s commitment to sustainability in operation, teaching, and research, since 2003, UF integrated sustainability into the development, planning, design, construction, and operations of its buildings on & off campus. UF has been using Leadership in Energy and Environmental Design (LEED™) as a framework to design, build, and operate green for over two decades. In this course, LEED™ V4 for New Construction and Major Renovation will be applied to the DCP Collaboratory project, with what if Zero energy buildings design application approach, benefits, and needs for teaching and research.

Class project, UF-653- DCP Collaboratory

Course Description

This is an interactive multidisciplinary course, in which students are introduced to green strategies and technologies for the design, construction and operation of high-performance buildings. The course is designed to equip students with the skills and knowledge needed to be effective communicators, critical thinkers, project managers, problem solvers, and team players. Students learn the strategies for greening new construction and continue through operation and building life with applying green building rating systems principles and framework of Leadership in Energy and Environmental Design (LEED™). Students will understand the alignment of the [United Nations Sustainable Development Goals \(UN SDGs\)](#) with green building strategies. This semester, **UF-653- DCP Collaboratory project/building** is used for the class project and hands-on learning. Successful course completion can prepare the student for LEED™ V4 Green Associate (GA) and Accredited Professional (AP) exams. In addition, this semester the course will apply the [Department of Energy](#) Zero energy design strategies that will cover the tools and skills needed to prepare the students for net-zero emission economy by 2050.

Learning Objectives

This course's objectives are to accelerate students' learning and leadership in the green building industry. The objectives emphasize project planning, design, construction, and operations. Students will:

- Learn about different green building rating systems and apply LEED™ V4 to building design, construction, and operation.
- Realize the strategies used to design Net-Zero energy building including types of energy, renewable energy, building envelope, HVAC, lighting, and plug load.
- Assess the application of LEED™ V4 strategies and technologies to the project's site, location and transportation, water and energy conservation, material use, and Indoor Environmental Quality (IEQ).
- Apply the skills and tools needed in today's green building industry including Energy Star Portfolio Manager, Energy Star Target Finder, energy modeling, Arc, LEED™ V4 online, Ecomedes, metering utility, and HelioScope.
- Learn how to administer a LEED project from inception to post occupancy and understand the value of teamwork.
- Prepare students for LEED™ V4 Green Associate (GA) and LEED™ V4 Accredited Professional (AP) credential exams.

Student Learning Outcomes (SLO)

Upon completion of this course, students will be able to:

- Attain the knowledge, skills, tools, and confidence needed to optimize the buiL&T environment and to thrive in the green building industry.
- Gain the understanding and application of the Net Zero energy building standards that will lead to net zero emission economy.
- Formulate and deliver high quality verbal and written communication.
- Appreciate teamwork, advocacy, and leadership that contribute to the advancement of building green.
- Prepare to earn LEED credentials.

Required Text/Reading:

- No textbook required, but below links from USGBC, UN, and DOE are integrated into the course
- <https://www.usgbc.org/guide/bdc> , <https://www.usgbc.org/leed> , <https://www.usgbc.org/leed/why-leed>, [LEED Crosswalks](#),
- [LEED V4.1 information](#)

- [United Nations, Sustainable Development Goals \(UN SDGs\).](#)
- <https://www.solardecathlon.gov/building-science.html>
- Weekly readings posted under each module on Canvas e- Learning portal, <https://ufl.instructure.com/courses/486845>
- Students expected to complete readings and watch videos assigned as advance preparation for class discussion.

This is intentionally left blank.
Follow to the next page.

Class Project

This semester, the class will be working on DCP Collaboratory, new building/project on campus. This project is in the design phase.

The class divided into 4 teams each team will present their part at the final presentation. However, each team will work on all aspects of the project from start to finish during the semester.

Each team will develop a PowerPoint presentation at the end of each module with integrated SDGs related to the module topic and net zero energy buildings, this will become a cumulative presentation for the end of the semester.

Each team will present a simplified presentation from the final cumulative presentation to reflect on the semester that includes the approach, strategies, tools, skills, and technologies learned to optimize DCP Collaboratory project and the potential and recommendations for taking this project to net zero energy building.

Final Project/Presentation: Team Delivery, each team to include and identify [UN SDGs](#) that relate to the team's topic and its application to the class project and make recommendation for UF buildings and campus. In addition, the Energy team to include the strategies to take the project to net zero energy building.

- **Energy Efficiency team:** Present strategies and technologies for net zero energy building including types of energy, envelope, HAVC system, lighting, plug load, commissioning, and tools & skills needed. In addition, complete Energy & Atmosphere credits submission with backup documentations. Prepare the final presentation to the client and include LEED v4.1 substitution and the [SDGs](#) related to the class project.
- **Indoor Environmental Quality and Sustainable Site team;** Present strategies and technologies used for the site management including landscape, rainwater, heat island, lighting, and the IEQ including approach, tools, and skills needed. In addition, complete IEQ and Site credits submission with backup documentations. Prepare final presentation to the client and include LEED v4.1 substitution and the [SDGs](#) related to the class project.
- **Water Efficiency and Transportation team;** Report on strategies and technologies used for water efficiency inside and outside the building and transportation including tools, approach, and skills needed. Also, complete Water Efficiency and Transportation submission with backup documentations. Prepare final presentation to the client and include any LEED v4.1 substitution and report of the [SDGs](#) related to the class project.
- **Material & Resources team;** Present strategies and technologies used for material selection, approach, skills, and tools needed. Also, complete Material and Resources credits submission with backup documentations. Prepare final presentation to the client and include LEED v4.1 substitution and report of the [SDGs](#) related to the class project.

Team/Project Manager's responsibilities:

- Lead the discussion in the breakout sessions that covers LEED, net-zero energy and SDGs
- Ensure the weekly PowerPoint presentation is completed for each module and submitted under assignments
- Manage and update the LEED checklist, credits, and prerequisites documents and upload to Canvas

Assignments and Grading

Assignment details, deliverables, due dates, and grades are published on Canvas and may be subject to change.

<i>Grading Category</i>	<i>Additional Details</i>	<i>Points</i>
Attendance	Required. Two points related to attending the SBE GBLC on October 5, 2023.	5
Readings (Individual)	Readings, and checklist assessment (points vary) (0-15) <ul style="list-style-type: none"> Weekly & Module-Based 	15
Discussion (Individual)	Discussions (points vary) (0-15) <ul style="list-style-type: none"> Weekly & Module-Based 	15
Presentations (Team)	PowerPoint presentation (points vary) (0-15) <ul style="list-style-type: none"> Weekly & Module-Based 	15
Exams	<ul style="list-style-type: none"> Mid-term (15) Final (15) 	30
Final Project	Final Class Presentation including UN SDGs and Net-Zero Energy Building	20
	Total	100

Grade and Grading Policy:

Letter Grade	A	A-	B+	B	B-	C+	C	C-	D+	D	D-	E
Numeric Grade	93-100	90-92	87-89	83-86	80-82	77-79	73-76	70-72	67-69	63-66	60-62	0-59
Quality Points	4.0	3.67	3.33	3.0	2.67	2.33	2.0	1.67	1.33	1.0	0.67	0.0

Final student grades will follow University of Florida grades and grading policies.

- Undergraduate Students: <https://catalog.ufl.edu/UGRD/academic-regulations/grades-grading-policies/>

Attendance Policy, Class Expectations, and Make-Up Policy

- Attendance is mandatory and participation is graded based on each class period (i.e., missing a multiperiod day of class will count as multiple absences in accordance with the number of periods).
- Students may miss up to the equivalent number of class periods as the course credits (e.g., 6 credits = 6 periods @ 50 minutes/each in Spring/Fall) without penalty and with no need for an excuse. Beyond those “waived” absences, students must provide a valid, and properly documented, excuse.
- Otherwise, unexcused points will be deducted proportional to the total number of periods where attendance was taken. Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with University policies as found at: <https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/>

- Follow UF Netiquette – Communication Courtesy:**

All members of the class are expected to follow rules of common courtesy in all email messages, threaded discussions, and chats. Please refer to:

<http://biostat.ufl.edu/resources/e-learning-resources/e-learning-basics/etiquette-online/> (Links to an external site.)

- Plagiarism** and/or academic misconduct and consequences of committing such behavior.

See Canvas for Additional Course Information

Additional information about the course is available on Canvas, including instructional methods, tips for success, personal conduct policies, mobile communications, computing policies, and more.

Expectations

- Be Present. This will allow you to get the most out of class time as well as for your classmates to get the most out of their collaborations with you.
- Put your cell phone away unless you are actively using it to further the class activities.
- Be prepared. The readings and videos have been carefully chosen to support the class activities.
- Listen carefully and do not interrupt others.
- Give quality feedback. What constitutes “quality” will be discussed in class.
- Respect the opinions of others, even when you do not agree.
- Keep an open mind; embrace the opportunity to learn something new.
- Avoid monopolizing the discussion. Give others a chance to contribute and be- heard.
- Do not be afraid to revise your ideas as you gather more information.
- Try to look at issues from more than one perspective.
- Respect others by learning and using the name and pronoun they prefer.
- Do not use offensive language.

Course Modules

General course module main topics and sub-topics are summarized below. Course modules and topical content including readings, assignments, discussions, PowerPoints, and final project are explained within Canvas and may be subject to change. In Canvas, each module is organized per date what is expected from the students before the class, during the class, and after the class. All links to readings, tools, and resources listed on Canvas and all assignments are linked within each module for easy access.

Below is just a summary for the course. Again, On Canvas, each module is developed with details including module learning objectives and SLOs, what to do before, during and after class, readings, assignments, discussions, quizzes, weekly presentations, and final project with rubrics.

Weekly Class Schedule

Date	Topics
Module 0: Course Overview	
TH, 8/24	<ul style="list-style-type: none"> - Welcome & Introduction - Review syllabus, course resources, UF resources and policies - Review use of Canvas, course files, material, and paperless approach - Review green building rating systems including: <ul style="list-style-type: none"> • Green Glob • BREAM • ASHRAE 189 • Living Building Challenge • International Green Construction Code (IGCC) • Florida Green Building Coalition (FGBC) • WELL Building Standards <ul style="list-style-type: none"> ○ International WELL Building Institute (IWBI) ○ WELL V2 checklist

- UF campus sustainability overview and status
 - [95 + LEED certified Buildings on campus](#)
 - [UF Office of Sustainability](#)
- Introduction to [United Nations Sustainable Development Goals, UN SDGs](#)
- UN [SDGs 2021 report: global, US, and other regions of the world](#)
- [US State Sustainable Development Report 2021](#)
- [DOE Building Science Education Series](#)
- U.S. Department of Energy, Solar Decathlon, <https://www.solardecathlon.gov/education-resources.html>

Teams

- Divide the class into teams
 - Identify project team managers (rotating every 2 weeks), members, roles & responsibilities, semester schedule for each team by the team and post it on team's Canvas page
 - Navigate [GATORCLOUD](#), use it as a free resource

TH, 8/24

In class breakout session:

- Each team review the module topics
- Each team to assign rotating biweekly project manager
- Review and rewrite your resume

- [UF Career Fair Fall 2023](#)

September 19th & 20th, 9:00 a.m. – 3:00 p.m.
Stephen C. O'Connell Center

Non-Technical Day, Tuesday, September 19th

➤ **Instructor's presentation on the module****Introduction to Net Zero energy buildings**

- DOE Building Science Education
 - [Module 5: Lighting Systems](#)
- Lighting design and specification inside and outside
- Lighting audit and commissioning

In class breakout session:

- Each team reviews the module topics
- Identify key strategies the project team should consider for plug load
- Review [LEED v4 checklist](#), EA for the class project
- Develop backup documentations for credits attempted
- **Each team develops a PowerPoint presentation** summarizing the module, identify approaches & strategies used, tools & skills learned, application of the Net-Zero Energy Building to the project and include SDGs related to this module

Assignment #8, assessment and calculations for lighting results from Ecomedes (*individual assignment*)

Assignment #8, discussion on Canvas module (*individual assignment*)

Assignment #8, PowerPoint presentation summarizing the module (*team assignment*)

Module 9: Plug Load, Renewable Energy and Commissioning

T, 10/24

➤ **Instructor's presentation on the module**

Reading links on Canvas module:

Introduction to Net Zero energy buildings

- DOE Building Science Education
 - [Module 6: Plug and Process Load](#)
- Building plug load review and specification
- Review energy modeling for plug load
 - [Module 8: Renewable Energy and Net Zero Energy Building](#)
- Renewable energy types, PV for the project
- Review drawings and specification for renewable energy for class project
- Renewable energy and commissioning
- Building MEP drawings and specification
- **Complete requirements for EA**

Tools:

- [HelioScope](#)
- [LEEDuser](#)
- [LEED v4.0](#) reference guide
- [LEED V4.1](#)
- [LEEDonline.com](#)

Guest Speaker: Renewable energy

TH, 10/26

Introduction to Net Zero energy buildings

- DOE Building Science Education
 - [Module 7: embodied environmental impacts](#)
- Buildings life cycle, from raw material extraction to operation to deconstruction or demolition.

In class breakout session:

- Each team reviews the module topics
- Identify key strategies the project team should consider for the class project based on the project goals
- Review [LEED v4 checklist](#), EA for the class project
- Develop backup documentations for credits attempted
- **Each team develops a PowerPoint presentation** summarizing the module, identify approaches & strategies used, tools & skills learned, application of the Net-Zero Energy Building to the project and include SDGs related to this module

Assignment #9, HelioScope design with ROI for class project (individual assignment)

Assignment #9, discussion on Canvas module (individual assignment)

Assignment #9, PowerPoint presentation summarizing the module (team assignment)

Module 10: Materials and Resources (MR)

T, 10/31

➤ **Instructor's presentation on the module**

Reading links on Canvas module:

- Material use overview
- Material specification considering post and pre consumer contact, EPD and HPD
- Construction and demolition waste management planning
- Design for deconstruction

Getting Help

Health and Wellness

[U Matter, We Care:](#)

If you or a friend is in distress, please contact umatter@ufl.edu / or 352 392-1575, a team member will reach out to the student.

[Counseling and Wellness Center:](#) 392-1575; and the

Sexual Assault Recovery Services (SARS)

Student Health Care Center, 392-1161.

University Police Department, 392-1111 (or 9-1-1 for emergencies). <https://police.ufl.edu/>

Academic Resources

E-learning technical support, 352-392-4357 (select option 2) or e-mail to Learning-support@ufl.edu, <https://elearning.ufl.edu/>

Other Campus Resources

[Career Resource Center](#), Reitz Union, 392-1601. Career assistance and counseling.

<http://www.crc.ufl.edu/>

[Library Support](#), <http://cms.uflib.ufl.edu/ask/>. Various ways to receive assistance with respect to using the libraries or finding resources.

[Teaching Center](#), Broward Hall, 392-2010 or 392-6420. General study skills and tutoring.

<http://teachingcenter.ufl.edu/>

[Writing Studio](#), 302 Tigert Hall, 846-1138. Help brainstorming, formatting, and writing papers.

<http://writing.ufl.edu/writing-studio/>

University Policies

Online course evaluation

Students expected to provide feedback on the quality of instruction in this course by completing online evaluations at <https://gatorevals.aa.ufl.edu/students/>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Students will be notified when the evaluation period opens and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via <https://ufl.bluera.com/ufl/>. Summaries of course evaluation results are available to students at <https://gatorevals.aa.ufl.edu/public-resuL&Ts/>.

Students with Disabilities:

Students requesting accommodation for disabilities must first register with the Disability Resource Center (DRC). The DRC coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services, and mediating faculty-student disability related issues.

Upon registering, the DRC will provide documentation to the student who must then provide this documentation to the instructor when requesting accommodation. You must submit this documentation prior to submitting assignments or taking quizzes or exams. Accommodations are not retroactive; therefore, students should contact the office as soon as possible in the term for which they are seeking accommodations. Contact DRC at **352-392-8565**, or viewing, www.dso.ufl.edu/drc/.

Student Honor Code and Academic Honesty

UF students are bound by The Honor Pledge, which states, "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment." The Honor Code (<http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/>) specifies a number of behaviors that are in violation of this code and the possible sanctions.

Software Use:

All faculty, staff and students at the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. As such, violations are also against university policies and rules, disciplinary action will be taken as appropriate.

Religious Observances:

Please inform the instructor of any religious holidays or other days of special religious significance that may interfere with your participation in this class so that appropriate accommodations can be made. The UF Religious Holidays Policy is available at: <https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/#religiousholidaystext>.

Sexual Harassment:

Sexual harassment is reprehensible and will not be tolerated by the University. It subverts our academic mission and threatens the careers, educational experience, and well-being of students, faculty, and staff. The University will not tolerate behavior between, nor among, members of this community that creates an unacceptable working environment.
