Class Periods: Monday 7-9 period FAC 208

Office Hours: Wednesday 1.00-3.00 PM and/or by appointment.

Course Description:
This course offers an overview of important economic development planning topics at local, national, and international levels. Urban planning and economic development often intersect in the real world. Economic development issues, both at the micro and macro level, such as employment, taxes, subsidy, human capital formation, investment, the influence of technology, rapid globalization, innovative entrepreneurship, and overall growth, greatly affect the built environment through many different channels. This course will evaluate some of these developmental issues and the channels using theoretical and empirical perspectives. This course also aims to give you an understanding of pressing issues in developing countries. The planning process in India (from 1950-current) will be discussed thoroughly and compared with different international development models. This course will be applied in nature and will take an interdisciplinary approach.

Textbook:

Recommended Texts:

Course expectations:
I don’t assume prior knowledge of economics. Some class time will be used to cover basics of economics.

Instructional Methods:
Classes will be conducted using lectures, discussions, and audio-visual presentations.

Course Requirements:
Weekly reading- you are expected to read and intellectually comprehend assigned readings for class discussion. For class discussion, readings will be assigned each week (most weeks). Students must post their critical assessment of the readings by Saturday night, before our discussion on the articles (by 11:55 PM Saturday every week).

Assignment- you are required to do two assignments. The assignments are an important course component; each will count toward your final grade. You will be given at least 7 days (announced in the class) to complete your assignments.

Class Presentation- each student is expected to present an assigned chapter from the textbook. Students will be notified in advance about the presentation. The instructor will present and discuss related material (not from the textbook) from various sources. These student presentations will count toward their final grades. The instructor and fellow students will grade you on presentation clarity, depth, and on ease of answering related questions.

Project- during the semester, students are expected to identify a research topic of interest. The final project for the course includes a research idea (300-500 words), bibliography, a comprehensive research proposal/paper (not more than 10 double space pages including bibliography), and a presentation (20-30 minutes).

Grading:

Assignment: 30% of the final grades (2X15%)
Article Summary: 15% of the final grades (3 articles)
Class Participation: 10% of the final grades
Class Presentation: 5% of the final grades
Final project:
  -Research Idea: 5% of the final grades (Due 1st class after labor day)
  -Bibliography: 5% of the final grades (Due 4th class after labor day)
  -Presentation: 10% of the final grades (To be scheduled)
  -Final Proposal/Paper: 20% of the final grades (TBA)
